

Joint Event – Harvard Club of Austria & HBS Healthcare Alumni Association

Dear Members of the Harvard Club of Austria,

Please find the full invitation to the following event [under this link](#).

We invite you to attend the first **event** of the "Harvard Club Industry series" on June 22, 2016. This is the first event of the Harvard Club of Austria in partnership with the Harvard Business School Healthcare Alumni Association.

The event will open with a keynote speech by **Dr Sabine Oberhauser, Austrian Minister of Health**, followed by an engaging discussion on the research initiatives under way in Austria in the transforming field of Precision Medicine. Afterwards we invite you to a cocktail reception.

This program is the first of many events through which Harvard alumni in Austria aspire to create an interactive platform to address and advance important initiatives in the healthcare sector. These sessions are designed to bring together inspiring leaders from various cross sections of the industry, ranging from government and academia to clinicians and businesses.

Details of the event are included below and in the attached invitation. If you are able to attend we kindly request you to register (see below).

PRECISION MEDICINE: CAN IT REDEFINE THE FUTURE OF GLOBAL HEALTH AND AUSTRIA?
JUNE 22, 2016 | 7:00 PM – 9:00 PM |
WEIN & CO, MARIAHILFERSTRASSE 36, 1070 | VIENNA, AUSTRIA

Rapid progress in big data and genomics has catapulted personalized medicine into one of the most promising solutions for curing fatal diseases and improving healthcare efficacy. Despite bold advancements in medicine, many diseases still lack effective cures as today's drugs and treatments are derived from broad populations and average statistics. Precision medicine personalizes medical treatment for each and every patient by taking into account their individual and unique variability in genes, environment, and lifestyle.

We invite you to join renowned experts in an engaging discussion on the potential of precision medicine and how research efforts underway in Austria aim to revive the country's leading position in the global health economy.

KEY NOTE SPEAKER

THE STATE'S PERSPECTIVE

Sabine Oberhauser, MD

Minister of Health, Federal Government of Austria
